

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Transferring To Business

Your Name Azaan Khan

Your Team Member's Name Muhammad Aaroon Laeeq

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

- Did Iteration 1B
- Did Iteration 2B
- Did final debugging
- Did commenting
- Peer Review

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

- Did iteration 0
- Did iteration 1A
- Did iteration 2A
- Did iteration 3
- Did final Debugging
- Peer Review

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

This experience was both exciting and difficult. I think that working with someone else really helped hone my abilities in coding with someone else on a shared project, something that is expected when going out into the real world. However, it was tough in the sense that we had to work off of the ideas we had in our own heads, so for example the way certain functions were set up or the name of functions, etc. Working alone on a task allows us to see through the beginning till the end in the form we want the

code to go in, but in projects, we have to work off of each other's code. Nonetheless, I found this project very helpful and gave me the opportunity to get a feel for what to expect.
